

IMPORTANT UPDATE . . .

The US Federal Government has numerous lofty goals, such as releasing the classified JFK assassination files, or implementing an audit of the Federal Reserve and Defense Department, or mandating 40+mpg automobiles, all of which are cleverly set to "finally" take place in "2017". To me, this indicates that, by then, the Federal Government already knows, and has known for some time now, that there won't be a government or citizenry around that will care about such relative "insignificant" things in 2017, compared to worldwide natural disasters, hence the synchronized postponement of all of these lofty goals until 2017.

Additionally, two military and three prophetic sources have indicated to me, as much as two years ago, that the November 7, 2016 presidential election will be indefinitely postponed due to "natural disasters"; likely earthquakes, volcanoes, and meteor storms. I therefore believe that the March 2016 date for Planet X, which people unfortunately forget was only an ESTIMATE, will ACTUALLY be ONE YEAR LATER, during March - April of 2017, the "Passover".

However, PRIOR TO THIS TIME, likely beginning in July through August of 2016, will be the BEGINNING of the "Birth Pains"; the earthquakes, volcanoes, and meteor storms. Subsequently, I suspect that March of 2016 will pass without incident, yet this late summer to fall will be the beginning of the "Tribulation" for NEXT YEAR'S event of Planet X.

The only other possibility, is an even later arrival, as late as 2021, with the US government creating Wars before then, to distract attention from upcoming celestial events, and the election being postponed because of these wars.?
