

Hi Dr. Morrison:

Thank you for writing. I am not and have never been an advocate of the PlanetX/Nibiru Movement! I am from a family of pastors/ministers on my father's side and intended on focusing my time researching the Truth of God's Living and Active Word. My book "The Mystery Explained" (free at <http://terral03.com>) was written in 2005 explaining the truth of God's Wisdom hidden very much in plain sight using His three witnesses of spirit, water and blood. God then placed a burden upon my heart to know 'the truth' about what really happened on September 11, 2001 culminating in the writing of my book "911Truth: Exposing the Cheney/Rumsfeld Black Operation" (free at <http://terral03.com>) ending that research project in late 2010. The Elenin Comet was discovered on December 10, 2010 by Leonid Elenin with a perihelion date on September 11, 2011 'and' Elenin is "NINele" or 911 backwards. Running keyword analysis of all 911-related documentation revealed truths that the term "explosions" never appears once anywhere in the 911 Commission Report and Arlington County After-Action Report with the singular term used exactly six times in each document. Keywording the Elenin documentation revealed a disturbing pattern that NASA/DHS/DoD operatives were running a desensitizing operation ensuring the Sheeple would remain sound asleep about what is coming from space.

Mensur Omerbashich discovered a seismic pattern connected to Elenin (at the time) going back to 1965 in his +6 Seismicity Paper to Cornell on April 11, 2011, when I was working with Marshall Masters on his elite radio panel that peaked my interest in this new investigation. Jim Marrs (from Texas that wrote JFK) sent me a confidential document called the "Dakota Report" describing "Project Black Star" in the Operations Section that connected dots between the 911 Inside Job and this star-like object coming from space representing another set of breadcrumbs for my investigation. Elenin passed by and turned out to be nothing at all, but a lettered agency-invented psyop used very much like the 2012 ISON Comet; as these would have been the first two hyperbolic comets discovered by Russians in recorded history. Both were reported to be mini solar systems with many common factors telling me that many of the lettered agency operative redeployed from the 911 Disinformation Program were active participants in the PlanetX/Nibiru Movement that you have been opposing for years. No sir. Again, I am not part of that running-in-place movement that reminds me very much of the fake 911Movement working every day to control the false narrative to hide 'the truth.'

What began as a keyword analysis research investigation proliferated into the Project Black Star Investigation, because the seismic pattern connected to Elenin has continued to include the Magnetopause Reversal Event from March 12, 2012 and the Mystery Martian Dust Storm from the same date that I realize you will never admit even happened from your obvious skill position working against the fake PlanetX/Nibiru Movement. The fact is that Earth sees high seismicity/volcanism every year at the predicted time that our planet passed between the Sun and Black Star 'and' again when Earth passes behind the Sun relative to the Black Star; and these dates are moving 11 to 13 days 'later' in the calendar year; as the Black Star moves in prograde fashion through the Leo Constellation (2008-2012) and Virgo (2012-2015) and now Libra. My Fukushima prediction was off by just four days and the Guerrero Quake Event from 2012 was off by just two days. That was the year magnetic portal connections were converging a week 'before' the event to produce the Magnetopause Reversal and Mystery Martian Dust Storm providing more evidence to support my original hypothesis that the invisible/collapsed binary twin to our Sun is already moving in the inner solar system.

No. I am not at all in the business of frightening anyone using the truth of God's Word and 911 and now Project Black Star. I am dedicated to finding "the truth" about what is really happening to share information with others allowing them the opportunity to make up their own minds one way or the other. My view is that this same Black Star came to the inner solar system in the Days of Noah and Moses and is coming again for the 'prophet' of Acts 3:22-26 that Moses says is "like me" from the passage. I am NOT predicting the end of the world by any stretch of the imagination. We are witnesses of how the Day of the Lord (1Thes. 5:1-5) is about to 'begin,' when this prophet (Elijah) returns to 'restore all things' (Matt. 17:10-11), Acts 3:19-26, etc.. Then, the Black Star returns in 3600 years to fulfill Christ's prophecies from Matthew 24 and Revelation saying the Sun turns 'dark' and 'black as sackcloth,' which happens when the Black Star reaches perihelion next to the Sun; before suffering a fall time Black Star/Earth Crossing Event. We do not see those signs on this Black Star Orbit Cycle, because Earth will suffer a 'springtime' Crossing Event focused on May 20, 2017 according to current modeling.

I really believe my five-year investigation is on the right track and the consequences have a big influence on all people around the globe, which means I am held accountable BY GOD to share the information rather than placing everything under a rock like a coward. I hope you realize that your Cosmophobia efforts to attack me are aligned with those part of the fake PlanetX/Nibiru Movement like Marshall Masters and John DiNardo labeling me as a Date Setter, because my research has gathered sufficient baseline data for building superior predictive models forecasting what will come next! Do me a favor and simply allow some time to pass, so we can test to see if the data produced by my new Binary Star Repulsion Model is accurate or not. The model says Earth reached the magical 90-degree angle relative to the Black Star in the first week of February 2016 ending the recent earth change lull period. The earth changes increase all the way through the end of May 2016 with focus on May 7, 2016, when we will see yet another Sun/Earth/Black Star nearside-alignment quake event, as predicted last year for the 7.8 Nepal Quake on April 25, 2015. I ran the numbers backwards all the way from that date to December 26, 2004 using the 188-day modeling to the big 9+ Sumatra Quake with the 1-inch Earth Axis Shift for the number 12.058; as the number of days 'later' each year that we should have seen a similar quake event. Use that factor moving forward and you have the 8.8 Chile Quake from February 27, 2010 with the 3-inch Earth Axis Shift, the 9.0 Fukushima Quake, Guerrero and, well, I think you catch my drift. The event window for the coming alignment event is very narrow pointing to May 7, 2016. We will know soon if my thesis is correct.

I would provide links for each of these points, but we already know you are really not interested; which is really kind of sad should my claims, evidence and conclusions turn out to be true.

Sincerely,

Terral
