

Hi Sheldon:

This is the same story as the 911 Inside Job Investigation with plenty of supposed experts, but none of them are willing to actually work through the evidence. They have 1000 theories and explanations that lead to rabbit holes going everywhere and nowhere. The PlanetX/Nibiru/Black Star topic is more 'spiritual' than you currently realize and the 'mystery of iniquity' (2Thes. 2:7-12) is in full effect! The 'deluding influence' forces people to 'believe what is false' and they stick with that false notion the rest of their deluded lives. Only a small number of us are immune to those dark influences. You have handlers working all around us from the lettered agencies working every day to control the narrative. Then you have their operatives working 24/7 doing their bidding with all kinds of stories circling the internet. Then you have their assets following them around adding support and working as shills/trolls/haters against those of us trying to inform people about what is coming from space. And then you have their dupes regurgitating their nonsense from the lettered agency operations to Illuminati/Elite groups driving their deluded minions around using all kinds of mis/disinformation and recruiting propaganda ensuring the security of the Rothschild-owned Underground Ark Cities.

I have stated from the beginning that you and John following the work of Robert Harrington was a big mistake, as he was apparently murdered/killed to create a smokescreen; as if he was taken out to hide the truth, when in reality his object was on the wrong side of the solar system forcing people to look the wrong way all this time.

You guys are wise to follow the SCIENCE and the EVIDENCE pointing to the FACTS in this case ignoring persons/personalities that speak against the truth told by the evidence. Period. Otherwise, you are dragged along as their dupe and responsible for standing in the way of the truth carried by those among us being ignored every step of the way. All of that is up to you, but I have seen all of this before and the song remains very much the same.

Terral
