

Hi Sheldon:

Some among us want to talk about auroras appearing 20 light years away, but refuse to address the mountain of evidence saying the inbound Black Star is very near and moving through the Leo (2008-2011) and Virgo Constellations (2012 - present) on way to Libra, just below the ecliptic plane. This reminds me much of the 911Movement and lettered agency handlers, operatives, assets and their dupes spreading dis/misinformation from every avenue like Dylan Avery, Richard Gage, Jim Fetzer and their cohorts pointing fingers in every direction, but at Bush, Cheney, Rumsfeld, the joint chiefs and lettered agencies; like SuspiciousObservers points at the Sun, BPEarthwatch points at CERN and Dutchsinse shouts "Fracking!" to explain the current earthquake uptick. The biggest event for the Project Black Star Investigation took place on March 12-13, 2012 with the Magnetopause Reversal Event that coincided with the Martian Dust Storm that turned Earth magnetosphere around for 28 hours. Who among those pretending to be part of the PlanetX/Nibiru/Black Star Movement is even willing to discuss the science relating to these events pointing to the Black Star moving through the Leo/Virgo Constellations? Oh, let's get back to those auroras created 20 light years away.... LoL!

BTW, the reason the aurora phenomenon takes place is the same reason that Earth magnetosphere strength fluctuates with solar output, solar sunspot formation, the growing/shrinking heliosphere; because the Sun and planets are connected via magnetic portal connections, which is the same reason we see X-class solar flares after the nearside-alignment quake events (like Nepal 4.25.2015) and just before the backside-alignment quake events (like Japan 10.25.2013 and Indonesia 11.15.2014) from Sun/Earth/Black Star magnetic portal connection convergence, crossing and divergence. And this is because the Sun and the Black Star invisible/collapsed binary twin are also connected allowing the Black Star to redirect solar electromagnetism via a second set of Black Star/planetary magnetic portal connections; which is the reason all the planets in the solar system are heating up in defiance of diminished solar output. And yet, the very people on this planet able to actually address the science also refuse with all their might to do so. There is a clear pattern of denial for those with the eyes to see. Keep your eyes fixed upon the Pacific Ocean/Ring of Fire and particularly the US/Canada West Coast where pressures are building in the span between August 15 and about December 1, 2015 marking the coming earth change uptick period; as Earth is about to make the move to outside-orbit position making that right triangle relative to the Sun and Black Star, when the Black Star/Earth magnetic portal connection will once again begin shortening and our planet moves directly through the Black Star headlights. We shall see.
