**Subject: Unprecedented California Wildfires Started with Directed Energy Weapons & 5G - Latest Analysis - YouTube**

<https://www.youtube.com/watch?v=Q2q7nN0JYWE> Watch this and realize what is going on in California. California is under attack almost as bad as Syria, Libya, Iraq were after 9/11. Started with an attack on the dam system. Now the Deep State working for the Banksters are attacking the citizens of California by using Directed Energy Weapons on their expensive homes, turning them to dust.

Just like 9/11. Directed Energy Weapons for sure. No trees are burning. This didn't happen by a spark or a downed power line. These are million dollar houses and this is going to crash the U.S. economy. That's the whole purpose, because the Banksters want to get their world currency going and they need the U.S. and its petro dollar to go away, just like the buildings on 9/11 went away, turned to dust in a few hours and just blew away, leaving little to no debris behind. Here is Dr. Judy Wood's almost last video dealing strictly with Directed Energy issue: <https://www.youtube.com/watch?v=zyY8xmSL4UQ&list=TLIY6cJpMpSpqxMDAyMjAxNg> The PTB have been trying to take California down since spring, to sabotage the dam system, but they couldn't pull it off. So now they're going after the million dollar homes. The whole idea is to take down California and there goes the U.S. right behind it, and then we get war and then a world currency and a world government and a world Messianic dictator. The Banksters know that Nibiru is here, and they figure now is a good time to make their move.

Another attack on American citizens by the banksters and their minions. Just like 9/11. Those SOBs microwaved 1500 people who were in the WTC buildings on 9/11. Turned those people to dust right along with the buildings. Please do watch Dr. Judy Wood's video here, about Directed Energy. It was 7 buildings that 'went away' on 9/11, turned to dust and blew away. There was no thermite paint or one directional nukes. Those huge buildings and the people and the contents within just turned to dust, 7 buildings, and blew away leaving little to no debris. Those SOBs are now pulling the same stunt on the people of California, and those insurance companies will not be able to reimburse.

These people have been stealing trillion\$ upon trillion\$ every single year to build themselves underground cities to retreat to, so they can duck in there while the rest of us die from the wars and the calamities that are coming from a rogue planet that these Banksters and their minions are well aware of, but we are only good for big plastic coffins and hollow point bullets.

<https://www.youtube.com/watch?v=KAaiSjznt68> Maybe after you watch this video you won't be so enamored with cell phones anymore? This video explains how this technology is so deadly, so powerful. It's like having a nuclear bomb that is quiet, easy to focus, leaves no collateral damage, nice precise destruction like we had on 9/11. What a deal for the Banksters to crash the U.S. economy. People have had 16 years to figure out 9/11 and people still believe in thermite paint and mini-nukes. Dr. Wood's work is plastered all over the Internet, but

why do research into facts when you can veg out in front of the TV and escape into Neverland? So now we're going to lose our country and probably our souls as well. The pastors need to do something. All these professional people who don't do their jobs – is so sad. Doctors who don't doc, and pastors who don't pastor (or preach repentance like Jonah did and saved Nineveh. Nineveh had an eclipse just like America did recently, signs in the skies like God is really, really trying to get our attention. But is anybody listening?
