

Hi Bob:

You are correct that Glenn Beck did not specifically point the finger at the Russians or the Chinese or the Iranians. His guest did. And this was done in the context of “what will this government do” i.e. the government of the United States, when we can no longer finance our debt. Beck pointed to the fact that numerous countries like Greece have executed what is commonly known as a “bail in.” If you have money in the bank you stand to lose all or part of it. The government will seize it in order to protect the integrity of the financial system. And then Beck asked Freeman is this going to happen? Freeman said yes. Then when prompted by Beck he pointed the finger at the three main elements of the BRIC nations. .. (He also threw in Syria,,can’t forget those evil Syrians...) This was no accident. That is why Freeman was called on the show. That is why Freeman was paid to write the book “Game Plan” which is not a game plan at all since it fails to acknowledge the source of our financial and economic problems -- the organized criminal conspiracy known as the Federal Reserve. But that is another story.

Now let us digress. This film started with the subject of “cyber attack” and then blended seamlessly into the subject of the government seizing bank accounts. Did you see that? Do you see how cleverly these two issues were blended together? If you don’t think that this video was carefully scripted, then think again. This is one of the finest pieces of spin I have ever seen. And it is clearly intended to condition the public as to what is coming .... Soon!

Freeman was right about one thing. There is going to be a cyber attack on our financial system. In the last year there have been numerous warnings in the controlled media about a “cyber attack” on the U.S. financial system. We have already had a few test runs to see how the public would react. Soon we will have the main event. But when this happens, do you think it will be the Russians who CONFISCATE both the bank and the pension funds of the citizens of this nation? The Chinese? Maybe the Iranians? I hope not. There is a good reason why Freeman is warning us. And it has absolutely nothing to do with any altruistic desire to protect the innocent and the gullible. If he had such a desire he would tell everyone listening to get their money out of the financial system and all dollar denominated assets. When this so-called cyber attack occurs, and the government is “forced” to confiscate more of the wealth of this nation, (this will be for our own good, you know ... we have to save the banking system, you know) the public mind will already be conditioned to focus on the

New enemy.

They will blame the Iranians for cyber-attacking us and collapsing our banking system! Or they will blame the Chinese, or the Russians? Don't forget those Syrians. They have a long list to choose from.

It will never occur to the folks who are skinned out of everything they own, that maybe the organized criminal element that runs both Washington and the New York financial centers were the culprits that bankrupted the USA and stole their life savings.

That thought will never cross their minds. Instead, they will turn to their favorite news station for further instructions. Lets see, if they are liberals they will turn on CNN and if they are "conservatives" they will turn on FOX. Or they will tune in to Glenn Beck. All will mislead!

Meanwhile my friend, keep your powder dry.

Protect yourself and your family, and remember that the real enemy, the banksters, are playing for all the marbles. They intend to take everything you own.

Tom
