~~ DARPA: New "Mark of The Beast" Tattoo ~~

"Audience applauds as Regina E. Dugan -- former Director of DARPA and current executive at Google -- describes with excitement the coming BEAST TECH smart tattoos and ingestible biochips that are ALREADY FDA APPROVED and that people will want to receive (and then be REQUIRED to receive) by 2017. She glows about the "super powers" the MARK will give her and says today's generation wants them too. Unfortunately, as documented in the book BEAST TECH, she is right."
