

Thanks for this audio clip from John Moore, Dane Wigington, and Tim Spencer. These extreme ultraviolet readings, plus the fact that the government is concealing the data beneath falsely undervalued reported readings, plus the fact that they have been blocking solar radiation with chemtrails for the past two decades, tells me what I have been reluctant to emphasize to all the folks who rightfully condemn geoengineering, as do I, that one ulterior motive for the ruling elite's chemtrailing the skies is to block ultraviolet radiation that they knew would intensify, based upon their projections of near future solar hyperactivity caused by electrical excitations from the incoming Planet X and its gang of gravitationally captured bodies. Dane, geoengineering indeed is rooted in the elite's insidious program to harm humanity, but chemtrails are also for the purpose of blocking solar radiation, not because the elite are altruistic, but because their earthly environment is important to their own sustenance. I have always been reluctant to say that chemtrails are for blocking intensifying solar radiation, but now it must be proclaimed, because Planet X threatens all life on Earth, increasingly so now, and we geoengineering critics must put Planet X at the top of our enemies list. John DiNardo
