

Gerald Celente overturns the Beck lie that blames Russia and China for the coming economic collapse. The criminal banksters created the Great Depression. That's common knowledge. Banksters always create economic booms and busts. So, when the banksters are about to collapse the economy, they have high visibility stooges like Glenn Beck divert the angry mobs away from the banksters.

<http://www.youtube.com/watch?v=czBIBEMuRQU>

Glenn Beck is an obvious stooge for the international criminal banksters. We all must out Glenn Beck and show the millions of libertarians, whom he is back-stabbing, that although he carries our favor on constitutionality, he covers the butts of the criminal banksters whom we all know are raping and pillaging our economy. This big Beck lie is timed to divert public outrage away from the criminal banksters and toward Russia and China, who are enemies of freedom, but who are verifiably *not* the culprits in this coming bankster-plotted economic crash.
