

Thank you for that. He is a fascinating man. I would love to talk with him.

My brother in-law worked with Warner Von Braun's group out of Huntsville AL for 25 years. He died last month taking with him valuable secrets.

I asked him about 3 years ago. "So then Bob, tell me, UFOs are man made right?". To this he said without hesitation, "They do not exist" and then went on to say "You should not go there" and handed the phone to my sister.

Secrets are what my family lived with and my doctor thinks that is why I was programmed at the U of M Dental School back in the 50's. The photos are of the Children's waiting room at the Kellogg building that houses the Dental School.

Forgive me if I sent these before but I show you some of the tools of these monsters. The Danovitch murals are the type of images that the MK Ultra doctors favored. Please see attachments.

I am told that they like artists because we think in pictures naturally and mind control attaches a command to a picture. My families theme was giants. For me Paul Bunion and his giant Blue Ox.

I found my family name in the "comics" and I found a

Charles Agar as one of the characters dealing with giant monsters and aliens. I also found a French Character Agar who is a child-again dealing with Giants and aliens. There was a French classical artist named Agar so it is likely that he was somehow related. A surrealist Agar was Eileen Agar.

[http://en.wikipedia.org/wiki/Eileen\\_Agar](http://en.wikipedia.org/wiki/Eileen_Agar)

My brother in-law developed land to land missiles for NASA.

There is more.....but that is your useless trivia for today.
