

Part 1) The Next False Flag Attack: Likely Scenarios

How could a group of the most powerful power-hungry would-be world rulers employ a highly advanced earthquake generator in Alaska to provoke to slide and plunge into the Atlantic ocean the already dislodged five hundred billion ton western flank of the Cumbre Vieja volcanic mountain on the Island of LaPalma in the Canary Island chain, off the West Coast of Africa, and to consequently generate a tsunami wave which American, Swiss, and British scientists estimate will reach a height of at least fifteen stories when it strikes Boston, New York, Baltimore, Washington, Norfolk, Miami, and the entire East Coast of the Continent of America? We do not know the month or even the year when such an event might occur, either naturally or by the hand of men.

From a Friend: [words within {braces} are mine. JD]
My knowledge is expansive, but there are many who know better which {false flag} targets are specific in other countries . . . you're one of them {JD: the only target I know of is Al-Aqsa Mosque in Jerusalem}. If I were asked what will be targeted here {in the U.S.A.}, it would take a week to cover it all because it's not just one target in the U.S. I'm looking at one, but this one is just the example set for the rest of the targets. The "thousand points of light" {a slogan of the Illuminati} that I mentioned in an article, referred to perhaps a thousand combined structures and buildings, which would be the 2001 World Trade Center attacks multiplied by five-hundred. There are two truths to that. One is that they do plan to devastate many key buildings and infrastructures, but not exactly as I explained. The "thousand points of light" actually refers to "the Illuminated ones," persons who are logistically positioned in places of power throughout the military, the corporate world, and the alphabet soup agencies {e.g. C.I.A., F.B.I., N.S.A., F.E.M.A.}, etc. They are the same people who frequent the Bilderberg meetings and so forth. John, the reason why Hoover Dam is important to acknowledge is not for the people that would be killed, if indeed it would be destroyed, but in how wars are conducted. The purpose of killing the dam is to actually wipe out the nation's major suppliers of food, which are Southern California and Arizona -- mostly California, of course. One-fourth of the food denied to the public makes them depend more on the government for their survival. They {the USraeli/British/Saudi quad-axis imperialist empire} plan to submerge the East and West coasts under water, so Southern California doesn't matter to them. These elite call us all a bunch of "useless eaters," literally, and that is why Hoover Dam would be their target. An installation here or a building there is meaningless to them after they have already destroyed the

World Trade Center. The WTC was the how and the *way* by which the U.S. dealt business with the world -- and in one day they destroyed it. That was the start of World War III, when they took the U.S.; and nobody sees it! After that initial shot that was fired, signaling their silent war against the U.S. citizenry, the global ruling elite had us sequestered away from the rest of the countries in regard to trade.

{JD: Do you think that their utter destruction of the Twin Towers: the controlled demolitions, the dustification by energy weaponry, and the prompt disposal of the hundreds of tons of evidence to China . . . do you think that all this was merely their symbolically covert declaration to the people that they were now destroying U.S. trade superiority? After all, China's trade superiority has surged and surpassed us ever since 2001.}

And then they started the wheels turning when they shot the last honest judge on the same day that they crippled U.S. Rep. Gabrielle Giffords. That was all intended to sever our umbilical, our lifeline, to the U.S. Constitution. You see, next are the big ticket items that we depend upon, such as water, food, and so on.

{JD: Hence, the destruction of Hoover Dam?
Regarding possible West Coast and East Coast disasters -- geologists are quite concerned about what they say is "a mega-tsunami" just waiting to roll across the Atlantic Ocean and strike the East Coast. They know that landslide driven tsunamis are gigantically greater than the common sea floor earthquake provoked type of tsunami, such as the one that struck Indonesia and Thailand on Christmas of 2004. The diabolical ruling elite of the World -- who are known to be planning disasters in order to seize all power -- have the HAARP technology to provoke a precipitous landslide of the five-hundred billion ton split-off western flank of the Cumbre Vieja volcano in the Canary Islands. Please view the video link below to learn of this threat, which the geologists are very concerned about. A commensurate oceanic landslide threat, looming on the Hawaiian Islands, likewise threatens the West Coast.}

People think that something has to be officially announced to call it something, like,

"WWIII has just begun because Russia just attacked China. . .

hold on to your seat and buy all the gold you can!"

When that happens, it's just a diversion for completely taking the U.S.A. for the future plan of rebuilding it into something else completely. The situation in Gaza is horrible, I know, but it is merely the method by which Israel maintains a military barrier against Russia once they make their way down during the visual

fight of World War III. You see, Israel and Saudi Arabia are building an empire from their "ground zero" points outward, and that is why they occupied everything surrounding themselves. After Gaza, they will take India. That is not spoken of, yet.

{JD: Notice that immediately following the cessation of Israel's bombing of Gaza, Netanyahu seized the largest Palestinian land area of the past thirty years in Israel's long history of its theft of Palestinian land. So, is this recent massive land seizure just the start of the USraeli/British/Saudi (Saudi Arabia, whom we know are colluding with USrael/Britain) . . . is this the start of their imperialistic expansion throughout the Middle East and the Ukraine?}

I know most everything that will happen and don't need to research. I've done all that. Most everyone is looking at the current event, or the story fashion of the day, and they can't see what I see. I want to show what it is that can be done {to inform the people}. I will show the threat, and then show what can be done to prevent it, as you know. I have the same problem as the people who are announcing that Israel {Zionist rulers, not the Israeli people} plans to destroy the Dome-of-the-Rock Mosque. Those people's problem is getting that information out there; that's my problem, too. They did their research, and so did I.
