

It is not my intention to cause problems for Mr. McCanney or for The Power Hour radio show. However, the plain language presented herein and on many other tape recordings which I have posted over the past several years tells us that Planet Earth is in trouble!

The past decade's stark history of unprecedentedly extreme geological and meteorological events shouts in our faces:

"HELLO! PLANET EARTH IS IN TROUBLE!

Those who do not want to rock the boat, nor make waves may *die* from these natural disasters, since the ancient pole shift, which Prof. McCanney herein states DID occur, and we absolutely know that the vast majority of the human race was annihilated by that pole shift.

Very basic physics, folks: When a meteor is plunging to the Earth, that meteor does NOT turn around and go back where it came from.

Likewise, when an object, not orbiting the Sun, begins to be sucked into our Sun's great gravitational force field, it does not turn around and go back out of our Solar System until it has looped around the Sun to be slingshot back out of the Solar System, as has occurred in ancient Planet X intrusions of this VERY SAME dwarf star; namely the Great Flood of Noah's Day, and the great Exodus of the Israelites from Egypt [The Book of EXODUS, Chapters 9 through 13].

My chief point, Power Hour, is that if there was an object moving into our Solar System when Prof. McCanney made this video, then that object has been gravitationally pulled by our Sun ever closer to our inner Solar System (i.e. Mars, Earth, Venus, Mercury, Sun).

John DiNardo

Prof. JAMES McCANNEY:

"THERE IS AN UNDERCURRENT OF NEW INFORMATION COMING FROM US, AND COMING FROM THE STANDARD ASTRONOMICAL COMMUNITY WHICH SUGGESTS THERE IS AN OBJECT RIGHT NOW MOVING INTO OUR SOLAR SYSTEM, AND THAT INFORMATION IS BEING KEPT FROM THE PUBLIC.

. . . . I'VE WATCHED COMETS COMING IN FROM THE SOUTHERN REGION OF THE SOLAR SYSTEM, AND THE INDICATION IS, FROM ALL THAT WE'RE SEEING, IS THAT THERE IS A BIG OBJECT MOVING INTO THE SOLAR SYSTEM FROM THE SOUTH [JD: of our Solar System's Ecliptic plane].

THE POINT IS THAT WE KNOW FOR A FACT -- FROM OBSERVING OTHER INCIDENTS -- THAT THE ASTRONOMY COMMUNITY IS NOT GOING TO TELL YOU ABOUT AN IMPENDING DISASTER. IN FACT, THEY'RE UNDER DIRECT ORDERS NOT TO TELL YOU."
