

<http://nypost.com/2013/12/12/beneath-yellowstone-a-volcano-that-could-wipe-out-u-s/>

I noticed that the mainstream news media is trying to conceal the alarming truth about the growing danger of an explosion of the Yellowstone super volcano caldera. There was a herd of bison filmed charging out of a sulfurous steaming, heating, or rumbling section of the Yellowstone National Park. The news media promptly issued a report that this film was a hoax, and that the herd of bison was charging INTO Yellowstone, not out of it. Now, it really takes an idiot to dream up a lie like that to pacify and distract the public. However, these idiots are also criminals, because as the danger grows that many thousands of unaware people may be killed in such a horrific catastrophe, those who chose to conceal this threat from the public must be charged with murder in the second degree.

Warn people! Store Food, Water, Silver Germicides . . . and google pollen masks, because volcanic dust particles are glassy and have sharp points which tear up lung tissue. John DiNardo

African nations say they will refuse to accept millions of Americans fleeing Yellowstone explosion catastrophe.
