

THREE STEPS AHEAD

In Chess it is said that you need to think three steps ahead of your move.

When we examine Chess we find that the pawns get wasted, the king is slow and ineffectual and the Queen has all of the power. Funny, that. I have been saying for some time now *Pay no attention to the Man behind the curtain, unless you notice the Woman behind the curtain as well.* Androgyne matriarchal mitochondrial DNA Evil and all.

The Game is simple:

- 1) Identify the Predator.
- 2) Alert the Herd.
- 3) Neutralize the Threat.

It seems that the whole world is frozen in Steps 1 & 2. 'Frozen' is a word used in psychology circles (isn't that an interesting phrase?) to describe how an adult can have personality traits that were dominant during early development (like 2-years old) carry over into later life because some traumatic event prevented the maturation beyond that behavior.

Granted, I have been at this a long time. It does wear you down. For decades I have felt like I was taking a dog for a walk on a leash while driving in a car. After a while the dog can't keep up and ends up a skinned, bobbing ball of fur at the end of a chain.

ANALOGY!

It was only an analogy.

But, really, when you are in an automobile that can go 100 mph and you are chained to a lap dog with stubby little legs there is just so much you can do without damaging the creature you have in your charge. I should have been beyond the orbit of Pluto by now and I am still circling the same old city block that is tantamount to Insanity (doing the same thing over and over expecting different results every time).

So, what is left for The World to DO?

The World (because we can't do any of this crap alone) MUST:

Plan three steps in advance of ALL of the things that it sees as dire ends to the Future.

“The Economy is going to crash!”

Let it. Why the hell not? After all, ALL of the patriot groups, religious groups and self-aware individuals on this planet will tell you that The Economy is the SINGLE thing that is wrong with this planet.

When was it ever NOT in a PROCESS of Crashing? The artificial inflation/recession is nothing less than attrition to wear you down and kill you. This is akin to the metal fatigue that occurs in a wire when you wiggle it back and forth until it snaps.

So, if it crashed and you were an assembly line worker in a car factory does that mean that you suddenly went stupid and no longer know how to make a car? If you are a bread maker did your brain turn to dough and you no longer know how to make bread?

THE ONLY THING THAT WOULD GO AWAY IS THE FAKE MONEY THAT WAS THE HEART OF THE PROBLEM IN THE FIRST PLACE.

If it is true and I have seen that it is: That a Promissory Note IS REAL MONEY, then how could the FRNs and The Economy going away EVER be a bad thing?

There are alternative forms of trade like metals and a listmember quite seriously said that a Blade of Grass would do in a pinch. Think about that, it was ALL FAKE to begin with so what is to prevent you from trading stems from your lawn?

If you don't like the idea of paper notes, then WHAT IS YOUR PLAN? IF you don't have one you are part of the problem. Do you know your neighbors? Can you trust your neighbors? Would you trade with your neighbors? Would they trade with you? Can you make your own shoes if they don't come from the World Mart? Can you sew clothes if you had the material?

Interesting one there: THEY MOVED ALL OF THE TEXTILE MILLS OVERSEAS PRIMARILY TO CHINA SO EVEN IF YOU WANTED TO BUY AMERICAN YOU COULDN'T. So, if you wanted non-GMO cotton woven in the USA – What is your plan?

Framed this way, will you ever think of The Economy the same way again? Does it make you feel stupid?

There is a game I play: *“How stupid are you?”*

When I am confronted with a concept that is so simple it is embarrassing I ask myself that question to keep myself honest and to have a gauge/benchmark to prevent myself from being taken the next time.

“Global Disaster.”

End Times, Planet X, HAARP induced cataclysms.

The bottom line is: What CAN you do about it? What are you WILLING to do about it? Have you prepared for it?

Preparing for a disaster is predicated on the fact of whether you can do anything about it. As I have said before, the only way to protect yourself from a detonation as outlined by statistics back in the 1960s was to be 80 feet below the ground. So much for those tin huts buried a few feet below suburban backyards. Unless you have self-contained air, water, and waste treatment you are basically screwed. So why worry? If you are concerned about HAARP, then where is the circuit breaker? Turn off the power and no more threat. CAN you? WILL you?

This is not even Three Steps Ahead. This is just getting enough Snow Drift Courage to take a running thrust at the drift to see if you can break through the mental barrier or not. It isn't even any proactive action to get the damned job done.

Einstein called them Thought Experiments.

If thought, hope, prayer, or good intentions were worth a pan of diarrhea then the world would be a Paradise (Persian word). But it is not so. ACTION is the only thing that is required AFTER the PLAN is worked out three layers deep.

So you don't like the Economy, the Government, the Judiciary, the (Fill in the Blank).

What have you done to replace them?

If they were to go away right now, it creates what is called a Power Vacuum and that is a prime invitation for Demons worse than the ones you know now to fill the Void.

HOW STUPID ARE YOU?

If you read the Protocols of Szion you will have known that their method was to form a parallel institutions (AGENCIES) or infiltrate and take them over from the inside (Fabian). As Dan McCarthy taught us they only think in binary choices. Either/Or. Your job, should you decide to accept it, is to think OUTSIDE THE BOX and come up with an outrageous (often simple) remedy to the situation. Like Hay on oil slicks. Growing mushrooms on the waste. There is always another option. “They” don't like surprises.

Have you even begun to start parallel institutions to replace what is sure to fail just like the Roman Empires before it that had a supposed decline?

“If you control the Food you control The People.”

Do you have a place to grow your own food?

Do you know how?

CAN you grow your own food with toxic Aluminum raining out of the sky in amounts measured in mountain snow at 11,000 times the EPA toxic level?

If we do not do Opposite Day on the bible story of Qain and Habel then it was the FARMER who killed the herdsman. We are tempted to leave the bible story alone because if we look at Monsanto (if you want to call that Pharming) who developed the Terminator Gene that threatens ALL LIFE on this rock, then the story rings true today.

Farmers are the greatest Whore sell-outs on the face of the planet. They are timecard punchers for the chemical companies and they do WHATEVER the companies tell them to do and they grow WHATEVER the companies tell them to grow. The world could have remained UNTOUCHED by GMO ANYTHING if the Farmers (who brag that they are Independent Graingers) had only said:

“NO!”

The simplest word in the Hu-Man language. The most powerful.

So, even if you have your survival kit of seed do you know what to do with it? Have you ever raised a crop and made enough food to eat for you and your family and left enough plants in the ground so that it can go to seed so that you can have a crop the next year? What if the plants are biennial? You have to wait 2 years for seed and if they mess with the Chemtrail weather and you lose the crop you lose the seed, you lose your food and you lose your future.

THIS IS WHY SOCIETY WAS DEVELOPED TO WORK TOGETHER.

You can build your cars on the assembly line while someone else bakes bread while someone else grows field after field of non-GMO seed so that you can live in a SOCIETY that works FOR each other instead of AGAINST each other.

But if Society was created for you, and you have not created it yourself then you are stuck at Step Zero and will never make it out of the Gate in time to survive.

WAKE UP CALL:

Master Gardeners consult me on growing food crops. Every single year since 1997, I have been losing germination percentage and yield at ALARMING rates. My ability to feed myself is grinding to a point of economic ruin. Chemtrails have blotted out so much sunlight that solar panels are losing significant power output. If you have not even learned the basics of feeding yourself:

WHAT DO YOU THINK YOU WILL BE ABLE TO DO ‘When it REALLY gets bad’?

Of course, that is an oxymoron. The psychopaths were killing people in the streets in the Name of God in the 1200s. There are CHILDREN totting M-1s in Africa. THE TERMINATOR GENE EXISTS! Just how BAD do things have to get before it REALLY gets bad? Personally, I don't know how people will answer that question. I guess I'll have to ask Jesus when he shows up.

“I'm not secure in my own person.”

You live under constant threat of EVERYTHING you have being taken away from you at any moment at the whim of Psychopathic Parasites.

What have you done about it?

You already know from the Protocols of Szion that ALL law enforcement and military are under their control. Who would you go to if you needed help?

Fair warning was already delivered to you that you need to study Martial Arts. The actual combat version not the sport version. **You** decide what level of response to aggression is delivered. You protect yourself. Because if you are NOT WILLING TO PROTECT YOURSELF then you will be WILLING TO OFFER YOUR CHILDREN FOR SACRIFICE. Whether it is to the White Coats or the government to have them taken away and given to pedophiles or cannibals. It always begins with YOU.

Does this mean that you are going to kick the ass of everyone you meet?

If you have the ATTITUDE that you KNOW that the Hu-Man body is as fragile as a strand of spaghetti, then you project that ATTITUDE into the Ether and it is received and perceived by the creatures that operate a reptilian level that can actually smell hormones and FEAR. If you have NO FEAR they are more likely to defer to you than to try to intimidate you into serving them. A Tai Chi master spent an ENTIRE BOOK making a SINGLE POINT that if you train in these arts you can INTERCEPT AN AGGRESSIVE THOUGHT AS IT IS FORMED IN THE OPPONENT'S MIND AND STOP IT BEFORE IT GETS TO THE MUSCLES!

I don't know how many times I have to say that before it gets through.

To train the body is to train the mind. To train the mind is to train the body.

Our other caller, Chris, said that with some simple techniques behavior can be modified.

To win without fighting is the warrior's greatest achievement.

None of this is going to happen if you are sitting on your brains. It takes 3 years to develop minor proficiency. After ten years you are considered to know a little something about your chosen Art. If you are FROZEN at Steps 1 & 2 above and have not even

trained to be able to protect yourself you will NEVER be able to advance to Step 3. You will NEVER be able to help yourself or your society. In ancient seafaring warfare they would drop large pieces of refuse in the bays to damage enemy ships if they tried to enter. Anyone who is not able to protect themselves and their families is the equivalent of so much dead matter in the way of those who would get the job done.

The police aren't going to do it for you. They are trained to see you as the Enemy. The military isn't going to do it for you. IF they were going to follow their fake oaths and turn things around they would have done it a long time ago. Moe always said, "*Why I oughtta rip out your esophagus!*" But Curly and Larry always maintained their cakeholes, so it was always an Idle threat. The Used Car sales pitch is that something is always going to happen in the future. You can't eat a promise. The truth is that anyone with a gun is a coward. Just like Miguel Cervantes said, any Idiot on a hill could pick off a man at a distance, so gone was chivalry where two men met on the battlefield and may the best man win. Cowards who have guns and do not stop evil are still cowards with guns.

Cowardice is born of Fear.

Fear is the Mother of all Gods. Epicurus.

Money, Peace, Food and Security. Four small experiments in simply THINKING three steps ahead so that ACTION can be taken after considering all of the options surrounding the situations. The discussion is not over. As an analogy: there are some Hu-man diseases that actually make the corpse bloat and explode so it is imperative to bury the body immediately so that the infection does not spread. Evil has taken over the body politic to the point of Lethal Infection so what passes for an Immune System must be activated to clear it. If that is not possible then there is No Future so get ready for liftoff. But a small worm carrying an even smaller disease can burrow into the root of a giant tree and kill the tree completely. There is what we grudgingly call 'hope' because there are examples in Nature. Next, is the ongoing, slow, step-by-step rebuilding of the body politic. Any idea no matter how seemingly insignificant or dumb is welcome. What could possibly be more ignorant than to suggest a baby get shot up with toxic vaccines? Compared to that, any proposed solution, even if unusable, seems remarkably intelligent.
